

## iCT220 Countertop & iPP220 PIN Pad

When the iCT220 countertop is used in conjunction with Ingenico's customer-facing iPP220 PIN pad, it allows you to process a variety of transaction types, including contactless/NFC payments as well as EMV chip cards. Created with clerk-customer interactions in mind, it allows customers to insert, swipe or tap for payments, while keeping a dedicated clerk-facing terminal on the counter.

### iCT220 Countertop

Lightweight, stylish and self-contained, the iCT220 is a rugged, easy-to-use countertop device that gives you the freedom to accept all types of electronic card payments without requiring an interface with a cash register or POS system.

#### FEATURES:

- EMV capable and PCI PTS V3 certified
- Dual Modem for IP or dial communication
- Sleek design and small footprint

### iPP220 PIN Pad

Designed especially for today's marketplace, the iPP220 gives you the ability to accept PIN-entry and contactless payments through a proven plug-and-play device.

#### FEATURES:

- NFC-enabled to accept Apple Pay™, Android Pay™ and other NFC payments
- PCI PED approved for customer PIN entry to support EMV when paired with iCT220
- Compact design to keep countertop clutter-free
