

VX 520 & VX 805 PIN Pad

The pairing of the VX 520 and the VX 805 PIN pad provides the reliability, simplicity, and security you need. This bundle enables you to process credit, PIN-based debit, EMV-based chip cards, as well as NFC/contactless payments. Having a customer-facing PIN pad allows for an exceptional customer experience while the clerk-facing terminal remains on the counter.

VX 520 Countertop

The VX 520 has NFC technology, enabling accepting mobile wallets such as Apple Pay™ and Android Pay™, among others. It offers a full range of connectivity options for dial or Ethernet. Its communication port area neatly connects cables under the device for clean countertops.

FEATURES:

- EMV-ready and NFC-enabled
- Quick-release, transparent paper door
- Supports multi-application for value-added services such as gift card programs

VX 805 PIN Pad

This contactless, customer-facing PIN pad delivers reliability, usability and next-generation NFC capabilities. It allows you to process a variety of transactions, with multiple connectivity options, while providing NFC technology for mobile payments.

FEATURES:

- EMV compliant so you are ready for the liability shift
- NFC enabled to accept Apple Pay™ and Android Pay™ and other NFC payments
- Backlit display and large keypad make for easy use
