

Verifone Credit Card Terminal

VX 520 Countertop

VeriFone's VX 520 leads the way with unprecedented performance, mission-critical features and more of everything you want in a countertop payment device. The VX 520 offers more revenue opportunities, flexible connectivity, and uncompromising security and dependability.

The VX 520 is available with NFC technology, enabling full flexibility to manage multiple NFC mobile wallets such as Apple Pay™ and Android Pay™, as well as other apps and programs. It offers a full range of connectivity options for dial or Ethernet. Its uniquely designed communication port area neatly connects cables under the device for clean countertops.

The VX 520 is built with long-lasting components to extend the field life of devices and minimize repair frequency. Its low cost of ownership and ease of use make it perfect for small businesses.
